

# Focus On Entertaining

## Project Profile

This contemporary terrace features a hot tub, a combined bar & grill station, an entry arbor, lighting, and even a fireplace. The terrace became a generous extension of the house and duplicates three interior functions of cooking, dining, and relaxing.

The house is stucco, and the terrace is surrounded by a matching stucco walls to visually tie the two together. The hot tub is designed to sit below the retaining wall where it is close to the house without dominating the view.
